WORKSHEET 1.1

Which organs make up the nervous system?

1. Complete the sentences.

- a) The nervous system is made up of the brain, **spinal cord** and **nerves**.
- b) **Sensory** nerves receive messages from the skin, joints and muscles.
- c) The **spinal cord** connects the brain to the nerves.
- d) The **brain** receives messages and then sends a message to a part of our body to react.

2. Complete the labels.

3. Order the sentences to describe how the nervous system works.

- 1 If we touch a hot object, our sensory nerves send a message to our brain.
- 2 The message travels along our spinal cord to the brain.
- 3 The brain stem receives the message and processes it.
- 4 Then, it sends a message to our motor nerves.
- 5 When our motor nerves receive the message, we move our hand away.
